

# Grazing Naturally Workshop

## Presented by Dick Richardson

Coalfield rd Moorlands, SA  
25th September 2017 9am - 4:30pm

*Join us for an entertaining and instructional day on the basics and principles of Grazing Naturally. Current ecological issues will be analysed and interpreted from a natural perspective. Practical activities and applications are demonstrated as simple and viable solutions to address ecological decline in grazing agriculture within changing climatic and economic conditions.*

### A one day instructional workshop

- Understanding ecological succession
- The effects of management changes on ecology
- The dynamics of grazing management
- Building soil depth and maturity with animals and plants
- Creating environmental change
- The tools of Grazing Naturally

### Who is Dick Richardson?

Dick is internationally accredited as a Holistic Management Educator and has been since 1995. Dick has trained, facilitated and consulted with many farming businesses around the world, including the US, UK, Aus and all the Southern African countries. He trained educators for HMI for many years too, both in the US and in Africa, especially in the areas of ecology and grazing management

Dick is now based in South Australia, has managed a biodynamic cattle and sheep property near Boorowa in NSW, a sheep and cattle operation near Jugiong NSW and a property of his own on the Boorowa river.

Dick's main strength is that he doesn't just talk about it, but is and has been doing it for a long time. Given his experience and knowledge he is very practical, and has a wide base of reference.
