

21 November 2017

CIRCULAR ECONOMY ACROSS EUROPEAN REGIONS: SYNERGIES AND COMPLEMENTARIES

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 730313.

Overview

This free to attend workshop hosted by the H2020 funded project SCREEN (Synergic Circular Economy across European regions) aims to bring together European stakeholders from across the Circular Economy sector to share some of the excellence and best practice of a number of regional initiatives and state-of-the-art regarding innovative approaches developed in H2020 projects. We are delighted that a representative from the European Commission will join us for this event.

In the morning session you will hear from representatives from Scotland / UK, Friesland / Netherlands, Denmark and Lombardy / Italy, giving an insight into latest Circular Economy and Smart Specialisation thinking and approaches in their regions.

In the afternoon session, a number of European Circular Economy projects and initiatives, will share latest state-of-the-art thinking on approaches to achieving a Circular Economy such as remanufacturing and new business models. The presentation will be followed by round table discussions, which will allow a deeper conversation on cross-regional opportunities, value chains, synergies and business models / finance. You will be able to choose your top three round table discussion topics on the registration form.

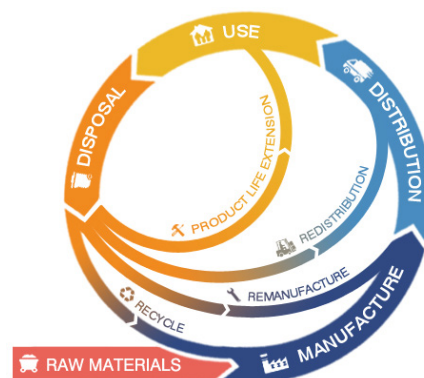

There will be an exhibition / networking area throughout the day and attendees representing Circular Economy projects / initiatives are invited to bring pull-up banners / posters / flyers. If you would like to exhibit, please indicate this on the registrations form.

The day will close with a networking reception with canapes and drinks.

- 15:15 Session 3: Round table discussions
- 16:45 Feedback from groups
- 17:15 Next steps
- 17:30 Networking and drinks

Who should attend

The event is suitable for businesses and organisations with an interest in circular economy, sustainability, resource efficiency, and smart specialisation.

Other events of interest

There is a workshop on the 22 November, also hosted by SCREEN at the same venue entitled 'Circular Economy across European regions: Building New Collaborations through Horizon 2020.' Please note: Registration is separate for the event on the 22nd, places are limited and travel should not be booked until your place is confirmed.

This workshop is organised in collaboration with the UK's National Contact Point for H2020 for Societal Challenge 5 and the European Enterprise Network. It is aimed at attendees who are serious about applying and developing project ideas relevant to the forthcoming 2018 H2020 calls for Circular Economy. The event will specifically focus on brokering collaborations for H2020 proposals and offer support on proposal preparation and consortium development.
