STUDY MORNING

Assistive Technology and IT for Learners with Dyslexia

Caroline Bateman

Caroline Bateman brings her professional and personal dyslexia experience together in this interactive workshop. She gave up a career in IT to support her children from failing through to exceeding expectations. Inspired by their success, and alarmed that many schools were not utilising basic technology, Caroline started running after-school clubs to help improve attainment. Concerned that numerous students are struggling needlessly, she welcomes any opportunity to teach students, parents and educational professionals, wanting all to achieve their true potential.

Caroline Bateman will lead this workshop on Assistive Technology and IT for Learners with Dyslexia. It will have a focus on KS3, although it will be applicable for all ages and stages of education. This event will be suitable for teachers, SENCOs, support staff and parents.

Bring along your laptops, tablets or smart phones, if you wish to try things out on the day.

Saturday 8th June 2019
