

YOU ARE INVITED

EXPANDED

MCA Spring 2017 Poster Session

About the event:

The MCA Foundation is calling for abstracts from all regional universities to provide opportunities for meaningful networking that may lead to research and commercialization collaborations.

In order to provide more opportunities, the poster session has been expanded to include two presentation sessions and a keynote speaker. From the abstracts accepted, 9 will be selected to be presented. All accepted abstracts will be discussed by the authors during the poster session. All posters will remain in the Cardwell Collaborative for 3 months, open to all for viewing.

About the keynote speaker:

Saibal Kar, M.D., is a nationally renowned interventional cardiologist at the Heart Institute at Cedars-Sinai Medical Center in Los Angeles, California where he is also director of Interventional Cardiac Research. Dr. Kar is an astute clinician and educator; a skilled interventional cardiologist with a special expertise in interventions of valvular and congenital heart disease; and a keen clinical and experimental researcher focusing on development of multiple medical devices and procedures.
