

Biography

Ludovic Grosjean (MEng, MSci, CEng, CPEng, NER)

Named one of "Australia's Most Innovative Engineers" by Engineers Australia in 2019

Elected as 1 of the 6 Young People of Action: Young Innovators by Rotary International. Ludovic Grosjean was awarded at the United Nations in 2018 for his innovative approach to address local and global needs.

Chartered Engineer & Project Manager with 13 years of Ocean project related experience, Ludovic is Principal Consultant at OceanX Group, an Engineering Consultancy specializing in Environmental Pollution Monitoring. Ludovic holds a formal qualification in Mechatronics Engineering and Environmental Monitoring.

As a supporter of Rotary Values, Ludovic has been providing an innovative approach to clean water through his environmental project "The OceanCleanX". As a leader and community educator, he strives for projects to reduce water pollution on a global scale and make a long-term difference for humanity. His career focus is to build collaboration between organizations in order to advance Engineering and preserve the Environment with the ultimate goal of Saving our Oceans.
