Roche AG - Bau 92

Grenzacherstr. 92

Basel

**Selected Lean tools for
effective project execution**

Project Management Institute
SWITZERLAND Chapter

To a person with a hammer all challenges look like nails

Selected Lean tools for effective project execution

In this workshop, we combine theory and practice through interactive exercises to develop a working knowledge of select lean tools to enhance your project management skills.

Our journey (and tools):

- **Decide slowly, considering alternatives and implement rapidly.**
Explore the benefit of the **Nemawashi** approach:
- Examine how to **understand requirements** (by translating the **Voice of Customer**)
- Engage your team in the generation of creative solutions (with exercises in **divergent thinking** and use of a **Driver Tree analysis**).
- Then logically select between the “**good**” alternatives to choose the “**best**” solution (using a **Pugh matrix**).

About our speaker - John Carton

John is Productivity Champion at Roche Pharma Technical Development, Small Molecules.

Chartered chemical engineer with an infectious passion for continuous improvement and a track record of achievement spanning manufacturing, logistics, supply chain and operational excellence.

Program

Doors open	18:00
