

WHAT NOW? Streamlining information and decision making for families in geriatric healthcare

A trip to the emergency room can trigger a windfall of changes, some are permanent to the patient's quality of life.

As a family member or primary caregiver, navigating today's healthcare system can be daunting, frustrating and overwhelming. It is our duty as healthcare professionals to create strategies and streamlined avenues for families to follow in this time of crisis. Learn how Life-Links Geriatric Care Management has built a model for this crisis resolution and gain a leg-up in your ability to help your patients!
