WHAT IS SBIRT?

Screening, Brief Intervention, and Referral to Treatment (SBIRT) is an evidence-based practice used to identify, reduce, and prevent problematic use, abuse, and dependence on alcohol, tobacco, and illicit drugs. The SBIRT model was incited by an Institute of Medicine recommendation that called for community-based screening for health risk behaviors, including substance use.

Thanks to UT School of Social Work, MHA of Middle TN, and SAMHSA, this training will provide you several video-based trainings, information, and a flashdrive filled with resources for your practice and organization! **Register today at www.mhamt.org.**
