## OPTIMAL CARE AND NEW THERAPIES FOR ADVANCED HEART DISEASE

### **PURPOSE:**

This educational activity is intended for primary care physicians and community cardiologists interested in increasing their competence and knowledge of best practices, evidence-based guidelines and new therapies in areas of advanced heart disease, including heart failure, heart transplantation, mechanical circulatory support and pulmonary hypertension.

### **COURSE OBJECTIVES:**

At the conclusion of this program, participants should be able to:

*Understand and appropriately employ strategies to implement evidence based guidelines for the treatment of heart failure patients.*

*Appropriately stratify patients by actively monitoring for risk factors and risk markers for advanced heart disease and employ early intervention strategies to reduce risk.*

*Appropriately employ strategies and recommendations for the use of MCS, including patient and device management.*

*Appropriately employ the general criteria and recommendations for when to refer a patient for evaluation for advanced therapies for PH and PAH.*

### **ACKNOWLEDGEMENT OF COMMERCIAL SUPPORT**

This program is supported in part by educational grants and exhibits from industry, in accordance with Institute for Medical Quality Standards for Commercial Support. At the time of printing, a complete list of commercial supporters was not available. Appropriate acknowledgment will be provided in syllabus/meeting materials onsite.
