

Title: How to Create Alignment

Speaker: Jay VanderZwaag

This is a workshop that introduces the Team Charter Process using a SMED case study to amplify the lessons of focus, execution and management support required to achieve and sustain process improvements. Those attending the workshop will receive:

- A thorough discussion of and associated tools that W3 uses in their Team Charter process to achieve sustainable improvements. With an example from production machine centers and support processes from maintenance, quality and scheduling.
- Open Discussions on when and how the Team Charter Process is developed and integrated into the Day in the Life of Leaders.
