Clinical Decision Making in Prescription, Procurement and Fitting of the Manual Wheelchair, Wheelchair Seating and Accessories for the Adult Patient.

Hosted by MossRehab

MossRehab
60 Township Line Road
Elkins, PA 19027

This intermediate one day course will explore the complex clinical decision process for selecting and procuring manual wheelchairs, seating systems and wheelchair accessories in the adult population with a variety of neurologic disorders who are using wheelchairs for the first time. A combination of lecture, lab, case presentations, video and group discussions will be used to improve practitioners clinical decision making when assessing, prescribing and fitting of the adult manual wheelchair. The content will review the process for obtaining wheelchairs and impact of patient diagnosis, prognosis, functional capability, body type and available funding in the process for selecting and fitting a client with manual wheelchairs. In addition, this course will closely look at two other categories of equipment: wheelchair seating and wheelchair options / accessories. These two other areas are quite important to understand because they complement and complete the clinical decision making in ordering of the adult manual wheelchair.

POPULATION: Adults

TARGET AUDIENCE: Physical Therapists, Occupational Therapists, ATP's

SPEAKERS:

Bryan Webster, MPT, ATP/SMS
Naomi Greenberg, PT, DPT, GCS, ATP
Marcia Moore, PT, DPT
Andrea Harrison, MPT, ATP

LEARNING OBJECTIVES

Participants will be able to:

1. Explain how the patient's functional assessment, postural evaluation and key body measurements all impact clinical decision making in selection of the adult manual wheelchair, wheelchair seating and wheelchair options/accessories.
2. Describe in detail the process of prescription and ordering of a wheelchair.
3. Describe three configuration adjustments to either the adult manual wheelchair itself and or wheelchair seating that would allow for improved patient fit/ mobility performance.
4. Identify and define, by observation, three different manual wheelchairs and describe the distinguishing characteristics and indication of each.
5. Discuss the members of the multi-disciplinary team and their specific rolls including prescribing physicians, therapists, assistive technology practitioners and vendors.
6. Identify two pieces of equipment that would fall into the category of wheelchair options/accessories.
7. Explain the criteria for a general use seat cushion and how that is different than the criteria for a pressure relieving seat cushion.
8. Define the various terms used to describe wheelchairs, wheelchair seating and wheelchair options/accessories.

Satisfactory completion of the continuing education units consists of full attendance with monitored sign in and sign out forms plus completion of a course feedback form that includes self assessment of learning outcomes.

*This course is approved for 6.0 Contact Hours by the **Pennsylvania State Board of Physical Therapy.***

MossRehab is an approved provider of AOTA continuing education. This course is offered for 0.6 CEUs. The assignment of AOTA CEUs does not imply endorsement of specific course content, products, or clinical procedures by AOTA.

Content Focus: Domain of OT: Client Factors; Occupational Therapy Process: Evaluation.

COURSE LOCATION:

Moss Rehab
60 Township Line Road
Elkins Park, PA 19027
