

Optimising Performance HOMES

Key design and construction considerations to optimise the thermal performance of a home as-built, without extra costs.

This seminar is suitable for residential architects, building designers, draftsman, builders, tradies, certifiers and consultants who are working on renovations or new builds, no matter how big or how small the job!

Each speaker will use this question as the basis for their presentation.
“As industry leaders in your respective field, what are the key issues and considerations for designers and builders to be aware of when optimising thermal performance, without added costs?”
