Medical Marijuana vs. Opioids: Current Research, Addiction, and How it is Affecting Employers

Join the Greater Detroit Area Health Council (GDAHC) as we explore the role medical marijuana has in the treatment of pain, the advantages over opioids, current policies and how it helps or hinders medicinal advancement. In addition, while laws may be cut and dry for employers, is it for patients who rely on cannabis benefits to help with pain? If it were a pill prescribed by a primary care doctor, would it be treated differently? How are employers truly approaching the subject? Join the discussion!

GUEST SPEAKERS/PANEL:

Tony Behrman

Executive Director – Human Resources
Nexteer Automotive, North America

Daniel Clauw, M.D.

Professor of Anesthesiology, Medicine and
Psychiatry, University of Michigan

Mark Ilgen, Ph.D.

Professor, Department of Psychiatry
University of Michigan

Jacquelyn G. Schulte, Esq.

Jacquelyn G. Schulte, PLC

Moderator:

Dustin P. Walsh

Senior Reporter, Crain's Detroit Business

Event Topics:

- Explore current research surrounding medical marijuana and how it relates to the treatment of pain and other afflictions. Is it a better alternative to current opioids on the market?
- Is cannabis being explored for further treatment options and what is keeping it from mainstream use?
- Is medical cannabis a gateway drug like opioids seem to have become?
- How are employers handling drug testing for employees who use medical marijuana to aide afflictions?
- Is the hiring process more difficult for employers now that medical cannabis is legal?

WHEN:

Thursday, October 26, 2017

7:30 AM – 8:30 AM Registration, Networking,
& Light Breakfast

8:30 AM – 10:00AM Presentation

REGISTRATION: (Click [HERE](#) to register)

GDAHC Member: \$25

Future GDAHC Member: \$35

Space is limited. Please register early to reserve your seat.
