Intended Audience

Nurses, junior doctors and all health care professionals with an interest in pancreatic cancer

Introduction

This event intends to use case studies to explore the patient's journey associated with the diagnosis and treatment of pancreatic cancer. Participants will be exposed to the various dilemmas faced by health care professionals involved in caring for this patient group from diagnosis onwards

Key Themes

Using the MDT process as a base, we will explore the key themes of:

- Diagnosis
- Treatment
- Practical guide to frequent issues faced by this patient group
- The future of pancreatic cancer

Learning outcomes

- Describe the presentation of patients with pancreatic cancer
- The importance of making sound diagnosis and staging
- Understand what treatment options are available for individual patients
- Address the medical and nursing issues specific to pancreatic cancer

Intended Audience

Nursing and other allied health professionals looking after haematology patients

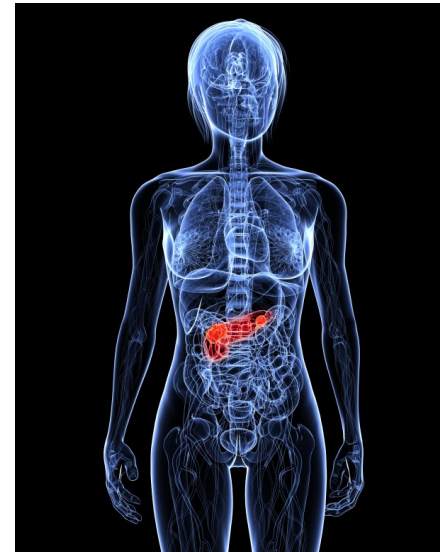

Fees

£90 General Admission

£80 Early Bird

£50 Christie Staff
