

# GUEST SPEAKERS AND PRESENTATION TOPICS

## ***Dr. Megan Brenner, M.D, M.S, RPVI, FACS***

---

Dr. Brenner is an Assistant Professor at the University of Maryland, RA Cowley Shock Trauma Center in Baltimore, MD in the Divisions of Trauma/Surgical Critical Care and Vascular Surgery. Dr Brenner will be joining the Mentice User Meeting via Webinar to discuss her Shock Trauma, REBOA Course Utilizing Simulation.

## ***Dr. Carlo A Dall'Olmo, M.D.***

---

Dr. Dall'Olmo is a Vascular Surgeon in Flint, Michigan and practices at the Michigan Vascular Center and McClaren Medical Center. Dr Dall'Olmo will be presenting at the upcoming Mentice User Meeting and discussing Technical Innovation, the Learning Environment and the Vascular Fellowship – A Mandate for Change.

## ***Jeff Davis, RRT-NPS, RCIS***

---

Mr. Davis is Program Director of Cardiovascular Technology and Respiratory Care at SouthWestern State College and has over 20 years experience in Cardiovascular Technology Education. Jeff will be speaking about a unique and developing program taking place in the state of Florida called the "Southwest Florida Transradial Project – A Collaborative Effort.

## ***Dr. Demetrius Lopes, M.D.***

---

Dr. Lopes is an Associate Professor of Neurosurgery and Radiology at Rush Medical College, Rush University Medical Center in Chicago, IL and will discuss the Advantages of Using Medical Simulation and Endovascular Patient Specific Simulation as a Training Tool.

***Dr. Mark Mattos, M.D.***

---

Dr Mattos is a Clinical Professor of Surgery and Education Planner for the Wayne State University Department of Surgery, located in Detroit Michigan. Dr. Mattos will present and share on October 2nd his 7 year experience in Teaching Endovascular Surgical Skills to a Wide Variety of User Groups at Multiple Healthcare Institutions.

Additionally, on October 3rd Dr. Mattos will serve as the keynote speaker for the Mentice “Train the Trainer” meeting, providing a 7 hour educational program designed to help educators achieve global immersion and integration of procedural skills and simulation training into medical school, residency and fellowship training programs.

***Dr. Daniel Schimmel, Jr., MD/MS***

---

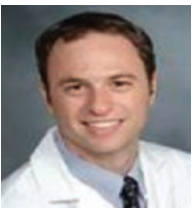

Dr. Schimmel is a Cardiologist and Assistant of Professor in Cardiovascular Disease at Northwestern University, Feinberg School of Medicine. Dr Schimmel will be sharing his research interests that are focused on Quality of Care and Simulation Based Medical Education to Improve Healthcare Delivery in the Procedural Specialties.

***Dr. Nancy Schindler, M.D***

---

Dr. Schindler is a Vascular Surgeon in Skokie, Illinois and is affiliated with multiple hospitals including NorthShore University Health System and Glenbrook Hospital. Dr. Schindler will be a presenter at the upcoming Mentice User Meeting and will discuss Curriculum Considerations for Simulation Integration.

***Dr. Ronald Winokur, M.D.***

---

Dr. Winokur is an Assistant Professor at Weill Cornell Medical College and New York Presbyterian Hospital where he specializes in Interventional Radiology. He will share his experience of Implementing a Multidisciplinary Simulation Based Training in Interventional Radiology, Leading to Better Patient Safety.
